<b>B</b>	<b>I</b>	<b>N</b>	<b>G</b>	<b>O</b>
We plan to make that a priority at a later time	Fullness of time (several variants)	Our intent is to have that in a future release	We're waiting to hear back from development	We are committed to the Lotus Domino/Notes engine
We hear what you're saying, and we'd like to do that, but it's a case of priorities and resources	Statement in time (several variants)	That's on my team's short list	Well, this is a new problem for me, I'll see what I can do	We intend to keep Traveler on Notes
We aren't hearing that from our customers	It's too expensive to QA	We'll take that back <b>(FREE SPACE)</b>	Use DIOP	We are committed to keeping Sametime chat on Notes
We're seeing growth in new emerging markets. So our attention is very much focused in that space	Let's take that offline	It's been SPR'd	Could you please PMR that?	Domino can't do what we want for that product
We're seeing quarter-on-quarter growth, so we're OK	Have you tried doing that in XPages?	Lotus Development decided it is working as designed	That works on Windows, did you try that?	We are looking for the Community to do that
